Education

SRM University AP Aug. 2024 – Expected May 2028
B.Tech in Computer Science and Engineering | CGPA: 9.41 / 10.0 *Amaravati, AP*
- **Relevant Coursework:** Data Structures & Algorithms, DBMS, OOPs, Operating Systems, Computer Networks, Design & Analysis of Algorithms

Experience

Open Idea Ecosyz Aug. 2026 – Present
Full-Stack Developer Intern *Remote*
- Built frontend features for **Bhojpatra**, a premium feast and caterer booking platform, using **Next.js 16, React 19, TypeScript**, Tailwind CSS, and Framer Motion; accelerated development with Claude, Gemini, and Antigravity alongside documented **Git/GitHub** workflows.
- Secured the platform by running a **security audit** with Antigravity agent skills sourced from GitHub and Google, uncovering client-controlled payment amounts, an exposed database, missing rate limits, and duplicate sessions.
- Improved release quality through **manual QA** and AI-driven **automated testing** run from an Excel test plan, covering the checkout and payment flow.
- Building the official Open Idea website on the same stack, studying user behaviour and UI/UX complexities to guide design decisions.

Bottrion Systems Pvt. Ltd. May 2026 – Jul. 2026
Software Development Intern *Remote*
- Built the **eSign Platform**, an e-signature system with serial and parallel signing workflows (see Projects).
- Developed hands-on proficiency in **IBM DataPower Gateway** by replicating its XML Firewalls, Multi-Protocol Gateways, and Web Service Proxies, plus XSLT transformations, AAA policies, and TLS client profiles.
- Cut environment setup friction by containerising the DataPower dev environment with **Docker** and WSL2/Ubuntu.

Projects

eSign Platform | *Django, DRF, React, PostgreSQL, Redis, Celery, Cloudflare R2* | Backend | Frontend May – Jul. 2026
- Streamlined multi-signer workflows by building a signing platform with **serial and parallel routing**, package management, and a full audit trail.
- Secured document handling by designing **10+ REST APIs** with JWT authentication and role-based access control.
- Automated notifications and background jobs with Celery, Redis, and SendGrid; stored documents on Cloudflare R2 and deployed on Railway.

UniMeet | *MongoDB, Express.js, React, Node.js (MERN)* | Code May 2026
- Simplified faculty scheduling by building an appointment platform with dashboards for **3 user roles** (Students, Teachers, Admins).
- Enabled real-time booking via JWT-secured REST APIs for slots, requests, and approvals, with a responsive React UI.

Hospital Management System | *MySQL* | Code May 2026
- Centralised patient, doctor, appointment, and billing data by designing a normalised MySQL schema with full CRUD.
- Automated operations and enforced integrity with optimised SQL queries, stored procedures, and triggers.

Technical Skills

Languages: C, C++, Python, JavaScript, TypeScript, SQL, HTML/CSS
Frameworks & Libraries: Next.js, React, Django, Django REST Framework, Node.js, Express.js, FastAPI, Tailwind CSS, Framer Motion
Databases: PostgreSQL (Neon), MySQL, MongoDB, SQLite, Redis
Tools & Cloud: Git, GitHub, Docker, Postman, Figma, WSL2, Linux, Vercel, Railway, Cloudflare R2
Concepts: REST APIs, JWT, TLS/SSL, IBM DataPower, QA Testing, Security Auditing, AI-Assisted Development

Certifications & Achievements

Certifications: MongoDB Associate Developer | IBM AI Fundamentals | Google Vertex AI: Prompt Design
Competitive Programming: Active LeetCode solver; completing Striver's A2Z DSA Sheet
Cybersecurity: Hands-on TryHackMe labs — Linux, Active Directory, Nmap, Wireshark, Metasploit
